The image shows a Windows file explorer window displaying the contents of a folder named 'decrypt-multi-release'. The files listed include 'bin', 'UUPs', and a large ESD file named '17133.1.108323-1312.rs4.release_clientconsumer_ret_v64re_en-us_8483d330ba2e2d8e6a7b4d37704358afb0c64.esd'. Below the file explorer, there are two command prompt windows. The left window shows the 'ESD' utility being run, displaying options like 'Continue including all editions', 'Include one edition', 'Include consecutive range of editions', 'Include randomly selected editions', and 'Return to folder selection'. The right window shows the 'ESD' utility creating an ISO file, displaying progress information such as 'Scanning source tree complete (971 files in 86 directories)', 'Computing directory information complete', and 'Image file is 3599106048 bytes (before optimization)'. The final output shows 'Storage optimization saved 18 files, 145408 bytes (0% of image)' and 'After optimization, image file is 3601147904 bytes'.
